

OCCUPATIONAL HEALTH & SAFETY POLICY

OCCUPATIONAL HEALTH & SAFETY POLICY STATEMENT

Overview

The occupational health and safety of all persons working for or engaged in a voluntary capacity (*thereafter referred to as 'members'*) for CLOC Musical Theatre, is of paramount importance to the management committee. All necessary initiatives will be taken to ensure that the workplace is safe and without risk to health, and to ensure that the Company complies with the *Occupational Health and Safety Act 2004*.

Policy Statement

CLOC Musical Theatre has a duty, so far as is practicable, to:

- Provide and maintain a safe and healthy working environment
- Provide and maintain safe and healthy plant and work systems
- Ensure that the use, handling, storage and transport of plant and substances is safe and without risk to health.
- Provide facilities for the welfare of its 'members'
- Provide information, instruction, training and supervision as necessary to enable its 'members' to work safely and without risk to health

CLOC Musical Theatre will also, so far as is practicable:

- Monitor the well being of its 'members'
- Monitor conditions at the workplace
- Maintain safety records at the workplace
- Ensure a high standard of housekeeping is maintained
- Engage suitably qualified persons in occupational health and safety to provide appropriate advice

RESPONSIBILITIES

Members

Each 'member' is responsible for:

- Taking reasonable care of his/her own health and safety, as well as the health and safety of other persons who may be affected by his/her actions.
- Co-operating with CLOC Musical Theatre in any action taken to comply with any legislative requirements.
- Wearing protective clothing and using protective equipment, where relevant.
- Maintaining a high standard of housekeeping by working in an orderly manner.
- Avoiding wilfully or recklessly interfering with any equipment, including safety equipment.
- Avoiding wilfully risking the health and safety of others.

Management

The committee of management is required to ensure that this policy is fully implemented and to support 'production heads/managers' in their area of responsibility

Production Heads/Managers

Each 'production head/manager' is responsible for taking all practicable measures to:

- Ensure that the workplace under his/her control is safe and without risks to health
- Ensure that the behaviour of all persons in the workplace is safe and without risk to health
- Detect any unsafe or unhealthy conditions of behaviour, and take remedial action
- Ensure appropriate safety equipment and protective clothing is used and maintained correctly
- Report all faulty or dangerous equipment to the Stage Manager Technical Director or the National Theatre Duty Technician.

SMOKING

Overview

Smoking is prohibited on all premises occupied by CLOC Musical Theatre. This smoking policy is in line with the Company's policy of providing a safe and healthy working environment.

Designated areas

'Members' are permitted to smoke during breaks in designated smoking areas outside the premises occupied by CLOC Musical Theatre. At the National Theatre, this is the loading gantry on Prompt side and at CLOC Central (Dane Rd rehearsal hall) in the area on the left of the front door. The container provided should be used for butts.

BLOOD BORNE VIRUSES

Overview

CLOC Musical Theatre recognises that some 'members' may be antibody positive or suffering an illness due to blood borne viruses such as Hepatitis B, C and the AIDS virus (HIV). Any such persons are entitled to protection from discrimination and confidential treatment of information about their health status. There is no legal obligation for anyone to inform the Company about their antibody status.

Precautionary Measures

While the risk of occupational transmission of blood borne viruses is negligible, occupational health and safety procedures relating to infectious diseases such as blood borne viruses are based on the principle that all persons are potentially infectious. Therefore, all injuries requiring treatment are to be referred to the duty First-Aid Officer and all persons administering first-aid are required to use the supplied protective equipment ie rubber gloves and a mouth guard for CPR.

ILLNESS/INJURY

Overview

CLOC Musical Theatre provides assistance to 'members' who suffer injury or illness whilst engaged in CLOC related activities.

Policy

- A 'member' who suffers personal injury or illness and requires medical care must notify the duty First Aid Officer or in their absence a member of the CLOC Management Committee. The duty First Aid Officer has the authority to refer a patient to a doctor or hospital or send them home.
- In the case of serious illness or injury, the duty First Aid Officer or in their absence a member of the CLOC Management Committee may request the services of an ambulance or taxi to the nearest hospital.

Accident Reports

In all cases, accidents and injuries occurring whilst engaged in activities for CLOC Musical Theatre must be reported on the 'Accident Report Form'. CLOC recommends that all 'members' have ambulance cover and take advantage of any opportunities to gain First Aid qualifications.

ALCOHOL

Overview

Alcohol is prohibited in all performance spaces and rehearsal venues occupied by CLOC Musical Theatre. This policy is in line with the Company's policy of providing a safe and healthy working environment. Lack of judgement through consumption of alcohol could mean a serious injury.

Policy

Any 'member' who is deemed to have impaired judgement due to the consumption of alcohol or other substances will not be permitted to participate in CLOC activities.

REST BREAKS

Overview

It is the view of the 'company' that 'members' who do not take regular breaks and have refreshment will become fatigued and can be a danger to themselves and other 'members'.

Policy

- Therefore, members of the cast, crew and orchestra should take a 15 minute refreshment break during a three hour call.
- During Bump-In and Bump-Out 'members' should take a break for refreshments every two hours and a half hour break for a meal every four hours. There should be a maximum working period of 12 hours followed by a break of 8 hours.
- Any fatigued personnel are encouraged to go home.

EMERGENCY EVACUATION

Overview

Emergency evacuation is the responsibility of The National Theatre. Any decision to evacuate must be made by the National Theatre Duty Manager or Duty Technician. All instructions given by either of these parties must be obeyed immediately. Occupants of the theatre should proceed quickly and quietly to the nearest exit and proceed to Talbot Reserve, at the side of the theatre.

CHECKLIST FOR AN OH&S WORKPLACE

Storage (housekeeping)

- equipment stored in racks wherever possible
- materials stored in such a way to minimise potential lifting problems
- materials are easily accessible

Floors & Walkways (housekeeping)

- ensure floors are not slippery : keep dry and avoid wet or greasy surfaces
- maintain adequate walkways free of debris eg leads, props, scenery
- walkways should be clearly delineated
- ensure unobstructed vision at intersection of walkways

Stairs, Ladders, Platforms

- ensure steps and handrails are firm with anti-slip treads
- ensure ladder rungs and bolts are firm and that fall-back protection is fitted on high ladders

Lighting

- there should be adequate illumination
- glare should be minimised wherever possible
- ensure adequate emergency lighting

Electrical

- ensure that plugs, sockets or switches are not broken or frayed
- circuit breakers should be installed and push controls clearly marked
- all electrical equipment should be tested and tagged.

Work Benches

- work benches should be clear of rubbish
- tools should be kept in a designated place
- the height of the work bench should be appropriate for the worker/s
- the bench should not have any sharp edges
- the layout of the bench should minimise bending, reaching and twisting

Manual Handling

- repetitive reaching and twisting should be minimised
- lifting from ground level or above shoulder height should be minimised wherever possible
- minimise the moving of heavy objects
- objects that are handled should be easy to grasp, have no sharp edges, and not liable to be hot, cold, slippery or bulky.

Hazardous Substances

- maintain material safety data sheets for all substances used. Make this information accessible to workers
- containers should be labelled with their labels clearly visible
- comply with any special storage conditions
- dispose of any waste chemicals in the appropriate fashion
- provide adequate ventilation and extraction facilities in storage and use areas of hazardous substances

Machinery

- machinery should always be kept clean and adequately guarded
- machinery should only be operated by those who are adequately trained
- stop/start switches should be clearly marked and within easy reach of the operator
- noise levels, fumes and exhaust should be controlled
- maintain machinery according to the manufacturer's specifications
- always observe and obey safety notices in relation to machinery

Fire

- fire extinguishers should be clearly marked and always in place
- fire extinguishers should be regularly serviced
- fire exits should be kept clear and well marked
- staff should be trained in evacuation procedures

Training

- follow the best (safest) work procedures
- clarify roles and responsibilities
- create a culture of safety by training new members
- meet legislative requirements

Personal Protection Equipment

- protective clothing including appropriate footwear, gloves, goggles
- venting
- rubber gloves for First Aid

Design

- give consideration to direction and choreography in relation to the physical consequences for performers
- give consideration to set design in relation to physical consequences to the crew in transporting and setting it up.
